Viki Spotter is a quite random game series from "for Kids Games" of simple flash graphics "spot the difference". The screen is split into half horizontally or vertically. You have to find other colorized or removed objects and point them out in the upper screen. An infinite hint function helps you if you get into any trouble. Mostly you play like 24 levels. 1 Level complete means earn 1 achievement. The games are usually overpriced with 2 EUR for just half an hour gameplay. So just wait for all parts getting just 0.39 EUR. The soundtrack is quite nervewracking so just switch it off.

Viki Spotter: Space Mission - Dark space, rockets, stars, foreign galaxies, mars aliens with 3 eyes - spot the differences. Its an endless minesweeper where the field constantly changes, so you dont get thoes stupid 50V50 game ending issues, because you can just go to the other side until you get stuck or move your way back, and chances are that section will be fixed.

The only thing I would like to see is a classic mode added without the row clearing mechanic.. It is excellent software that makes Windows launcher mac osx/iOS style.

If you like mac osx/iOS style, you may choose this.

P.S.

I should to say thank you

Thank you very much, Apple pal Dev

I love iOS, I wanted for such software. Story is well thought out and very engaging. Interesting puzzles. Great game.. Excellent game full of challenges and a high level of replay value great for both adults and kids of all ages.. An interesting concept of Rock-Paper-Scissor Gameplay with twist and bluffing! I definitely recommend to give it a try since it feels different to many other J-RPG or Game Maker available on steam. I love this game, but all the bugs you have to deal with are really frustrating, i started a new game to try the new companion from the beginning, except she randomly disappeared from my companions list without trace. then, i created a halfling on the tavern, and her model is not visible, she is just clothes floating around.

I got the game for the good old time feels~ NeoGeo era, you shall be missed <3. Breathing Fear - Indie is an adventure game with elements of horror. The main focus of the game is on the atmosphere of fear and mystery house, which was our main character (who is escaped from prison inmates). During the game, we use all kinds of light sources in order to advance through the story and does not get the path of a heart attack (yes, our protagonist can die from stress and even has a special scale for this indicator). It is also exploring the house, we find various notes and diaries, which reveal to us a little ictoriyu home.

Now I talk about the disadvantages. One of them is the lack of plot ties in the beginning of the game. We start the game at a certain moment, and almost do not know anything about who we are, where we found ourselves, and that's the story in this house, but the plot is revealed further bad and even has multiple endings. For another position in line cons include errors and mistakes in the game to give the achievements.

The graphics of eight bits, which can not all enjoy, musical arrangement is quite acceptable.

In general, we have a good game with a trading card and achievements for a small price, but has not been canceled discounts.. Items mandatory to finishing the game vanish from inventory, toxic effect is heavily making it unenjoyable to even go through levels witnessing how environment looks and works, even less when under pressure.. how to make a sequel to a game that doesn't exist.

uno dos tres. I finished this game a couple of weeks ago, and this game, along with Ubersoldier 2, Wolfschanze 2 (which is not bought through Steam) told me one thing: game review is such a private thing that it differs so much among gamers. This game, except the last boss fighting level (which is a waste of time), is filled with imagination and packed with intensive gameplay. The most significant feature is climbing up to a high altitude, which is so exciting in different sceneries: the giant factory brings a terrifying and mysterious dream in my childhood back, the beautiful city of Terra makes me like touring in an exotic world. The gunshots are blamed by many gamers because it falls short in the feeling of shooting, but it doesn't matter because this games is not about gun fighting, its about scenery and climbing, a feeling of journey in a wonder world. Of course, the last level of boss fight gave me a lesson: never waste time on a boss that is too hard to beat!. They released a patch last month that broke several aspects of the game. Most notably multiplayer and the costume shop.

Zero communication from the devs when or even if they are gonna fix this.. Trapped Dead: Lockdown is mediocre game but still good to try.

Pros:

- Good Story
- alot characters to choose (5) each one have their final +V- same
- good atmosphere about zombies
- variable waepons to choose and skills
- The dialogues with some Npcs are funny (they used bad language +best)

Cons:

- Need good Optimization
- a Little Buggy sometimes when clicking with the mouse.

I only recommend this game if you have a big discount.. ok nobody buy the fricken game till its out i cant even get past the first level. This game will murder your eyes and use your sockets to stuff in neon strobe-lights.. Extremely dull,
me off, blimey mate bloody hell, too much filler not enough interesting stuff
Can't even pick a waifu.
