About This Game

The Future is Meow!

"There's humour here in spades... It's fun, fast, colourful"

- Rock Paper Shotgun

The Cat Machine is a game of logic, and also cats. Cats riding around on Trains. As we are all aware, the stability of planet earth's orbit around the sun is maintained by an enormous and very secret underground machine. A machine where cats of various colours ride around on trains, as cats have done since time immemorial.

Without this secret mechanism, the earth would undoubtedly fold in on itself, probably with a rather satisfying popping noise, but also with the unpleasant side-effect of then ceasing to exist.

The Cat Machine places you in charge of designing that contraption.

Wait what.

A fun logical puzzler, the game is all about working on a solution, the correct design that will 'process' multiple configurations

of cat trains. Cats can only travel on tracks that are the same colour as the cat itself (of course) and the cat at the front of the track decides where the whole train will go. Once a cat has traveled along a coloured track, it flies away, as cats are well known to do. The goal is, for every train, make all the cats, including the white one at the end, fly into the ether.

This is the only way to save the earth.

Featuring:

- More than fifty levels!
- So many cats, you wouldn't believe it. It has, I think, all the cats.
- Beautiful, beautiful music!
- Utilises high-fidelity, 60fps Advanced Cat/Train Simulation Technology for maximum cuteness.
- Support for Windows, Mac, and even our Linux friends.

Brilliant in its simplicity, get it while its on a deal! worth the \u00a3!\$. ok but i got better games to spend my time on so thats why i only have 0.4 but those 0.4 hours were enjoyable

. This game is Great! It's a FPS which pits you against a maze/map and your best time to get through the level. It's in early access so you get one gun, But a ton of levels and it has a Coop mode. The levels are tricky and require a quick trigger finger and aiming skills. The graphics and sound are equal to any triple A game. Anyone who plays shooters will enjoy this title.. I really want to like it but without updates it feels like abandonware. It's playable(ish) but needs more polish an a few more bug fixes.

I'll change the review once updated but for now DO NOT BUY.. This game is a blast!

Prepare to dodge bullets. Prepare to rip parts of the enemies you'll face. Prepare to die, a lot.

And prepare to have much fun while doing so.

9/10. another fiesta clone oo goodie XD. Not much here for \$7.99. It was kind of fun for about 2 minutes, but then I was done.. Serious Pay to Win Issues

At its core I like Breach, its essentially an arcade mode version of MD, putting you in short but fun levels. All the strong gameplay from MD is here, just in bite sized packages this time, and Breach offers its additions such as a double/triple jump, overall the gameplay is solid and fun. I'd like to spend more time with it, but this is essentially a Freemium Mobile Game disguised as a PC Game. Its got all the signs, constant online connection needed, incredibly scare resources, pitful exp and credit rewards for replaying missions, gameplay driven by loot boxes, and a level select screen straight from any mobile game. The only thing missing is a godawful energy system, which it thankfully lacks.

I managed to get 1 hour into it before I hit my first wall, a mission where you have to take out a tough enemy, unlike the other missions takedowns and sneaking were useless (infinite resources), so I'd have to use ammo to defeat the enemy, unfortunately ammo cannot be looted, it must be brought directly with credits or acquired through loot boxes, in fact everything must be brought, theres no reliable way to get an item without grinding or paying up. This is incredibly bad free to play design worthy of a Supercell Title, there are better ways to do free to play and breach falls into all the traps of bad F2P.

In Conclusion: It 'costs' a 7 gig download, so if you want to give it a try and can spare the bandwidth you'll have some fun within the 1st hour atleast, and maybe more if you're willing to burn through your resources. But if you're time or bandwidth are limited, you'll want to give this one a miss.

Old 8 bit Bomberman if you liked this is Online Multiplayer Bomberman , and Good game really , Free game and fun game. Excellent number puzzle game.

simple arithmetic equations, that can be solved numerous ways.

challenge is that selection of cells is governed by rules that up the challenge.

You like puzzling it out against a few numbers ?

Then buy this game.. So yes i have very few hours of play but i owned the game on 360 for years. I asolutely loved it on the 360 how ever this game needs to be a twin stick shooter in my opinion. So if you played the game on 360 and thought it would be the same i'm sorry you are wrong. You use the mouse to both shoot and move and it is the most frustating thing ever. I bought this game on sale and am reggreting it already don't make the same mistake. If there was a way to even have the keyboard keys move you left and right while using the mouse to shoot the game would be infinitely better but until then i cannot recommend.. It's the same amateurish tour of a dilapidated medical facility that you must have frittered away thirty minutes of your life on a good half dozen times by now if you follow the ever-deepening landfill of cack that is Steam's horror category with any regularity. At least this one has the borderline decency to pass on charging you \$10 for the privilege.

Book-ended by a text card for an introduction and some monotone cartoon stills for an ending, forgoing even the formality of a title screen, you can't really yell at **Inside: Before Birth for having a lazy plot because that's really like yelling at a monkey for not having wings. The plot, the gameplay, the tension, it was never going to be there. It's a school project that somebody's misplaced pride led them to sell on Steam, rather than just submit as coursework.**

What can I say? I feel like I should be rounding these horror games up by the dozen lately and branding them all with the same review. Ignore. Walk away. It is worth no moneys and so to spend any on it would only contribute to a deep remorse that may well eventually place you at the bottom of a ravine. Why take the risk, eh?

https://www.youtube.com/watch?v=mnwzYAVn3_U. I didn't know that Portugal was a part of Africa.. very beautiful game the story is amazing now i get why they called their self Another Story and the option to level up fast is the best i hate when games make you fight a lot so you can kill the boss good thing that you did that

.....
[other than that it's a good game](#)

[i suggest you buy it 10/10. This game is pretty horrid, but I got it for free and it came with steam cards.](#)

[Buy it on sale, for those sweet, sweet steam cards.](#)

[. it's too short, IMO, and you can only choose one guy, which is kind of sad. The story isn't really complete, will they be making a second game. I wonder?. Not worth 50\\$. Wait till they fix it and lower the price about 45\\$. Don't be fooled!!](#)
